***Response to Amendment***

The following is in response to the amendment filed on August 28, 2006.

***Allowable Subject Matter***

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a supporting and wiping device for a machine wire in a papermaking system comprising at least the claimed combination of a plurality of supporting and wiping strips and a carrier for the strips, the carrier having the claimed arrangement of beams and transverse webs fixed thereto with voids and projections in the webs and in mutual connection with associated voids and projections of the strips, all aligned and arranged as claimed, wherein the transverse webs have at least two parts which are displaceably disposed relative to one another, and a relative displacement of the parts causes the supporting and wiping strips to be clamped and secured to the carrier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

Applicant's arguments filed August 28, 2006 have been fully considered.

The rejections of claims 1-10 under 35 U.S.C. 112, first paragraph, and under 35 U.S.C. 112, second paragraph, set forth previously have been withdrawn in view of the arguments and amendment to the claims. The structure and function of the claimed invention is clear.

The prior art rejections under 35 U.S.C. 102(b) over Robinson (US 3,194,729), Corbellini (US 4,957,598), McPherson (US 5,630,910), and Simmons et al (US 5,076,894) has been overcome by amendment. It is understood that the claimed structural features of the transverse webs of the carrier are not taught or reasonably suggested by these references.
